Diagnosed at any age. Patients can be diagnosed at any age. While trigeminal neuralgia occurs most often in people over age 50, patients can be diagnosed at any age.

For more details about the side effects of your radiation therapy, and if treatment with an Accuray product is right for you, ask your doctor.

Most side effects of radiation therapy can be managed. Some side effects, such as fatigue or changes in hair, skin and nails, may be temporary. Other effects, such as changes in sleep or appetite, may last a lifetime. You may experience some or all of these effects. Treatment-related side effects are temporary and usually resolve within a few months to a year. Some long-term side effects may be related to the type of cancer treatment and can include hearing loss, bone density issues, and cognitive changes.

Treatments include radiation therapy, surgery, chemotherapy, targeted therapy, and immunotherapy. Treatments may be used alone, or in combination, to stop the growth of cancer cells, kill cancer cells, or help the body’s immune system fight cancer. Treatments may include chemotherapy, radiation therapy, and surgery. Treatments may also include radiation therapy, chemotherapy, and surgery.
